

## **Road to Victory**

*This is sung by the crowds on the platform of Bethnal Green underground station where they are all sheltering during one of London's frequent bombing raids. They have just heard on the radio the wonderful news about the Allies first victory in North Africa at El Alemain.*

In the midst of dark confusion  
We fight for the right to be free  
With all our might we'll keep alight  
The flame of liberty  
We are ready for the challenge  
In air on land by sea  
We'll do our part with all our heart  
On the road to victory

Defenders of the nation  
Know we shall never fail  
No matter what we have to face  
We can and will prevail  
So keep on pushing forward  
Go against this tyranny  
We'll do our part with all our heart  
On the road to victory

There's a light on the horizon  
A beacon for all to see  
The sign of hope eternal  
That sets our spirit free  
We believe in what we're fighting for  
On that we all agree  
We'll do our part with all our heart  
On the road to victory
